ABOUT US

OVERSEAS ENTERPRISES

believe in superior customer satisfaction. Overseas Enterprises is a customer driven solution focused company, for over 60 years we have been devoting a lot of time and energy to automation and control. We have faced lots of challenges in our entire period in the area of reinvent ourselves without losing sight of our strong values.

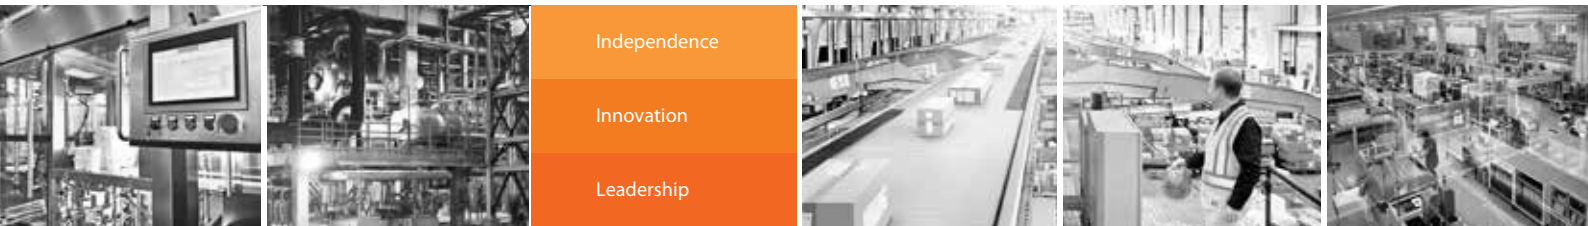

- ☑ The entire staff and management of the company are thoroughly professional.
- ☑ They stick to deadlines and deliver quality services; the company has gained good clients in less time due to their effective working style and good services.
- ☑ The experience and expertise of our entire staff has given us a unique understanding of the requirements of our clients.

Our company provides a wide range of products, systems, solutions and services. We continuously observe market as well as consumer wishes that enable us to derive the requirements of our customer and when the time comes, we often have a solution ready. It is reassuring to know that, no matter what, you can always count on our expertise, our enthusiasm and our reliability. We tackle everything from sample request to seemingly unsolvable problems.

MISSION

“Everything we do is geared towards delivering the right automation solutions that facilitate our customers to increase productivity, reduce costs, improve quality and enhance safety.”

OVERSEAS ENTERPRISES is devoted to deliver well-engineered Industrial Automation Solutions and Electrical Systems that enable our customers to achieve their production targets efficiently and effectively and aspire to attain ultimate customer satisfaction.

VISION

Delivering innovations to help our customers in enhancing their business productivity, reducing their operating costs, improving their energy usage, and finally, increasing their profitability.

At OVERSEAS ENTERPRISES we believe that the control system of any production facility is the key for a successful and profitable production, our Industrial Automation Solutions and Electrical Systems are designed and implemented in accordance with this belief and maintained by our commitment to support our customers throughout the project life cycle.

MANAGING DIRECTOR

Overseas Enterprises is the sole distributor of number of leading brands in industrial automation and control. Our leading pace has always been accredited to our culture, with a deep understanding that our clients come first; identifying their needs and wants is the driving force that pulls us towards our eagerness to deliver. Our commitment and services to our customers are to be the best, most flexible, with the capability to adapt to changing market demands. We believe in focus and specialization and each of our employee share our passion and pride to be part of this mission.

Each passing year presents numerous unprecedented opportunities, which we capitalized on through our team's collective effort and dedication. Each of our projects is the best in the market. The strengths embedded in Overseas – the knowledge and cohesiveness of our people, longstanding relationships, technological capabilities and an established market presence enables us to continuously evolve. To this end, we will continue to be a corporate group capable of accurately identifying customer and market needs and providing world-class, forward-looking solutions. Your continued support is greatly appreciated.

END OF LINE AUTOMATION

In today's global marketplace, end-of-line automation can ensure the production of finished products for delivery to the distribution channel. Manufacturers are constantly looking for more progressive ways to make their end-of-line production more productive and time saving without any fatal incidents. That's where Overseas Enterprises comes in with its automation expertise and makes the end-of-line process easier. OE has a wide range of tested end of line packaging solutions to suit any product type.

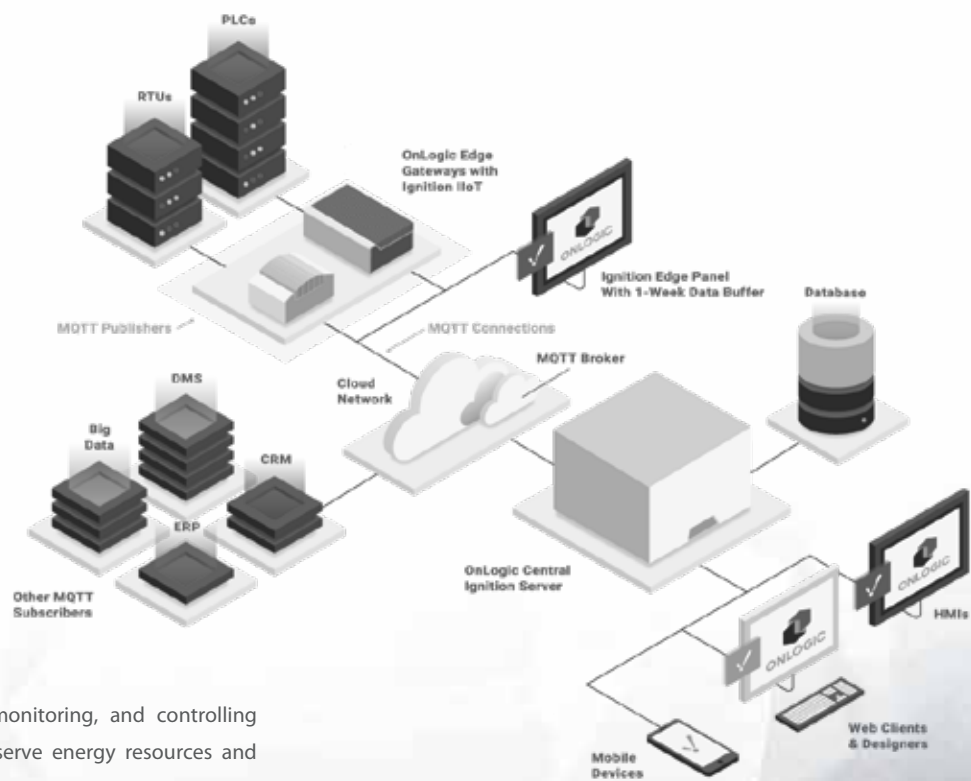

WAREHOUSE AUTOMATION

- › Bar code scanners
- › Image/Pattern based scanners
- › Sorting stations
- › Palatalization
- › Inventory Management System
- › Safety Curtains
- › Safety Scanners
- › Case Erectors & Case Sealers
- › Metal Detectors
- › Check weighers
- › Thermal Printers

ENERGY MANAGEMENT SYSTEM

OE is a leading vendor of Energy Management System and provides complete solutions for energy management & power quality monitoring for the commercial, industrial, and utility markets. OE supplies high quality yet economical Energy Management Solutions which include Digital Power and Energy Meters, Report based SCADA systems that cater to a wide range of industries.

Energy management is related with planning, monitoring, and controlling energy-associated processes with the aim to preserve energy resources and energy cost savings and to protect environment.

FACTORY AUTOMATION

Factory automation is the implementation of technology and systems to automate a manufacturing process with the goal of increasing productivity and reducing costs. The level of automation may be anything from single operation automations to end-to-end automation where there is no human involvement. Factory automation can be implemented at any point in the manufacturing process from material quantity control to production and assembly and finally to packaging and dispatch. Overseas Enterprises serves customers from diverse industries – building products, food and beverage, consumer products, automotive, metals, and more with the following automation services.

- › Single Automated Machines.
- › Automated Production Lines.
- › Fully Automated Plant(end-to-end)
- › Motion And Control & Drive system
- › Information System
- › Upgradation and migration of exiting Control systems.
- › Production Automation
- › Machine Automation
- › Plant Level Automation

PROCESS INSTRUMENTATION

OE Process Instrumentation offers innovative, single-source measurement solutions to increase plant or process efficiency and enhance product quality. Our intelligent instruments are also designed for seamless interplay with the larger world of industrial automation and control systems – enabling greater process transparency and smarter decisions for your business. Benefit from the competence of OE: a full automation vendor operating around Pakistan, with service available 24 hours a day, 365 days a year.

- › Process Controlling & Protection

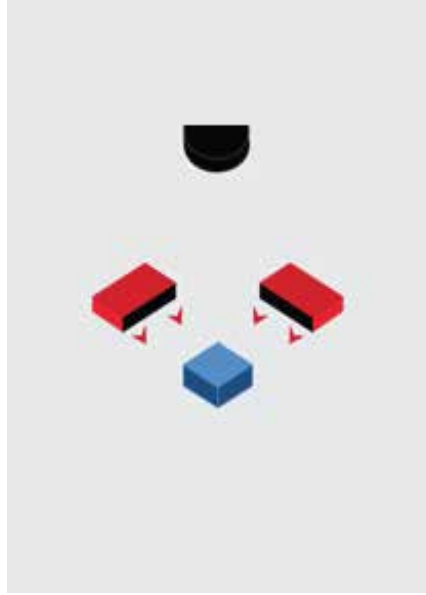

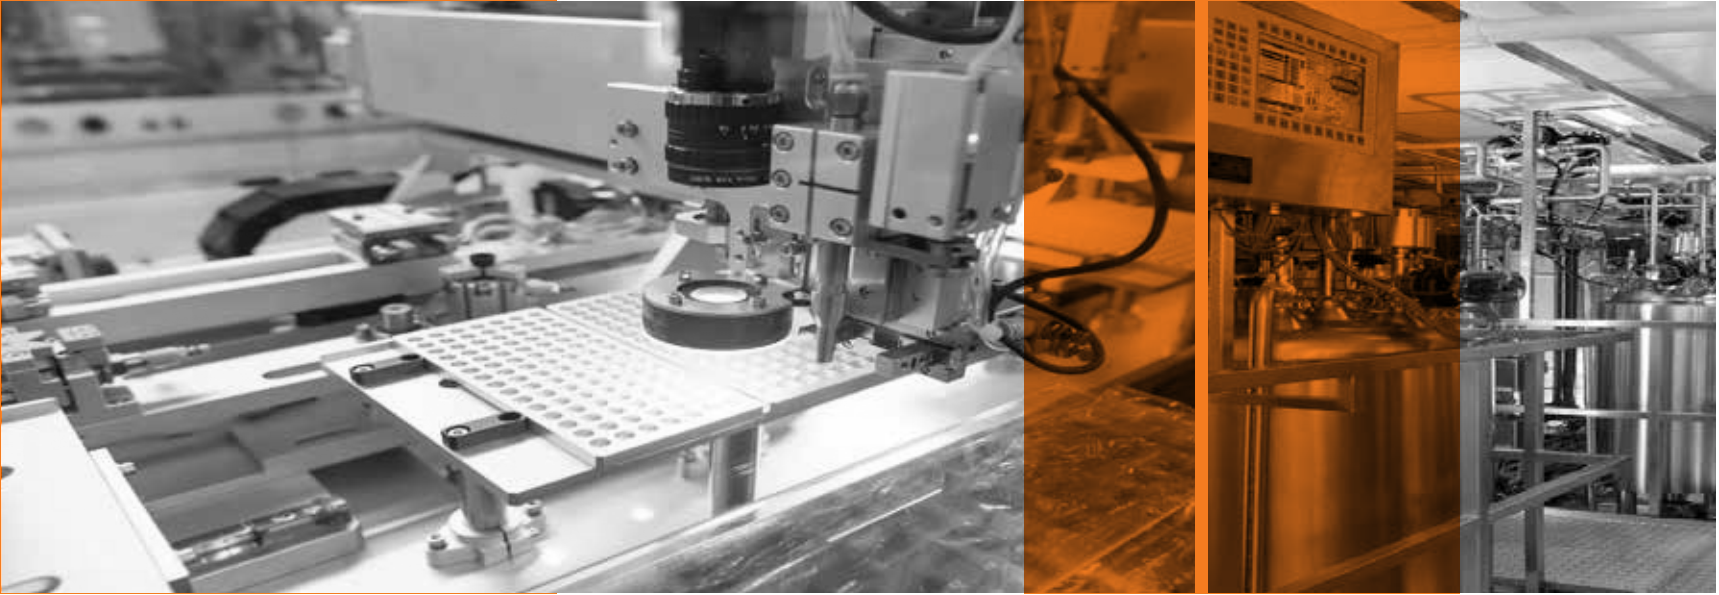

VISION-SYSTEMS

Companies in a wide range of industries rely on vision sensors to perform simple pass/fail, go/no go inspections that help ensure products and packaging are error-free and meet strict quality standards. Our Cognex vision systems are unmatched in their ability to inspect, identify and guide parts. By reducing defects and increasing yield, our Cognex vision sensors help manufacturers streamline their operations and increase profitability. Cognex vision sensors provide easy and reliable inspections thanks to powerful vision tools, modular lighting and optics, and an easy-to-use setup environment. These self-contained, industrial-grade vision systems combine a library of advanced vision tools with high-speed image acquisition and processing. A wide range of models, including line scan and color systems, meet most price and performance requirements.

As a leading international manufacturer of intelligent sensors and system solutions for industrial applications, we are on hand whenever safety, precision, and efficiency are of critical importance. Our slogan “Sensor Intelligence.” serves as a guidepost for the future of Industry. We support our customers from start to finish – from the initial idea and the prototype to the serial product, from commissioning to Services. Our intelligent solutions control, secure, and optimize systems and processes, laying the foundation for sustainable production with technologies that are in keeping with the latest trends.

From factory automation to logistics automation and process automation SICK is one of the leading producers of sensors. As a technology and market leader, SICK’s sensors and application solutions for industrial use create the perfect basis for reliable and efficient control of processes, for protecting people from accidents, and for preventing environmental damage.

Videojet Technologies is a world-leader in the product identification market, providing in-line printing, coding, and marking products, application specific fluids, and product life cycle services. Our Uptime Peace of Mind® brand promise means Videojet listens to our customers' needs and provides the right combination of equipment, supplies and support for reliable performance.

Product

Full line of industrial continuous inkjet printers for marking and coding applications

Ideal for marking on flat or curved surfaces, continuous inkjet printer technology is a non-contact printing method that can utilize a range of continuous inkjet inks to print on almost any substrate. With over 40 years of development experience, Videojet offers a range of CIJ printers and deep application expertise to help you identify the right printing solutions for your needs. Our inkjet printers are:

- ✓ **Simple with the Smart Cartridge™ fluid delivery system to virtually eliminate spills**
and help ensure the correct fluids are being used
- ✓ **Easy to use with long run times between preventive maintenance**
- ✓ **Reliable with on-board Code Assurance features to help prevent coding mistakes**
- ✓ **A natural fit in your line with auto-cleaning printheads for fast start-ups**

Print batch codes, serial numbers, barcodes, and traceability information on products and packaging with Videojet continuous inkjet printers. Videojet will help you select the ideal printers and inks for your production or packaging operation. Talk to a Videojet application expert.

Easy-to-use industrial laser markers to apply clean, crisp codes on products

Laser marking is a non-contact printing method that marks or engraves high-quality 1D and 2D bar barcodes, multiple lines of text, batch numbers, lot codes, logos, and more on products to provide product information, identification, and traceability data.

Light Duty CO2 Laser Marking Systems

High-performance CO2 Laser Marking Systems

Fiber Laser Marking Machines

Videojet 1280 CIJ Printer

- Can print 1 to 5 lines of print at speeds of up to 533fpm (162mpm) (10 characters per inch, single line of print)
- More than 250 complex messages

Videojet 1610 Dual Head CIJ Printer

- Can print 1 to 5 lines of print at speeds of up to 960fpm (293mpm) (10 characters per inch, single line of print)
- More than 250 complex messages

UV Laser Marking Machines

High Performance solution

Full line of thermal inkjet printers for high-resolution text, bar codes, and graphics

Thermal inkjet (TIJ) printing technology is an ideal fit for applications where high quality print is essential and ease of use is a primary consideration. With maintenance requirements consisting of a simple wipe of the cartridge print array and printhead, Videojet and Wolke brand thermal inkjet printers provide unparalleled simplicity.

Murr Elektronik is your system partner:

Murr Elektronik is a global leader in the development, manufacture and distribution of automation solutions. Our products can be divided into four core lines: Power Supplies and Control, Interfaces, Cables/Connectors and IO Systems.

Our high-quality, innovative products and focus on market requirements sets us apart from the crowd. Our customer-oriented approach ensures our tailored solutions make your applications better. We have a widely diversified product range in the field of industrial automation. Murr Elektronik Provides a comprehensive range of control cabinet products in the fields of power supply, interface suppression and processing. Interfaces from the control cabinet to the field for every flexible application. Passive distribution systems for machine installation and replace expensive terminal boxes with complicated wiring. Compared to conventional wiring, this simplifies installation and reduce servicing times.

World leader for actuator and valve technology for HVAC systems. For over 40 years, Belimo successfully focuses on the heating, ventilation, and air conditioning markets providing quality solutions that will increase energy efficiency; reduce installation cost with the fastest delivery times in the industry. Our innovative products have always been designed to help achieve objectives better, faster, and more economically. Investing in new technology is key to our success, and Belimo will continue to offer products to help businesses succeed.

Belimo delivers more than just products. We support our customers with innovative, efficient and energy-optimizing solutions that bring success to both our customers and ourselves

TELESCOPIC BOOM

ARTICULATED BOOM

Slab Scissor Lift

- › Tight indoor and outdoor worksites with firm, level, surfaces.
- › AC e-drive on hydraulic Drive configuration
- › Max-capacity 544kg
- › Max-height 52.32kg

Rough Terrain Scissor Lift

- › Four-wheel drive machine with exceptional traction, speed, and upgradeability
- › Ac powered, option for diesel generation or electric-only,
- › Max Capacity 1134 kg
- › Max Height 58.89 ft

Articulated Boom Lifts

- › DC electric and Bi-energy engine
- › Indoor and outdoor models.
- › Maximum horizontal reach 69.75 ft
- › Maximum vertical reach 141.56
- › Maximum capacity 300kg unrestricted, 454 kg

Telescopic Boom Lifts

- › Greater horizontal outreach than any other type of aerial platform
- › The platform can support up to three people
- › Maximum horizontal reach 89.99 ft
- › Maximum vertical reach 180 ft
- › Maximum capacity 340kg, 454 kg restricted

Aerial Work Platforms

- › Easy to use and cost-effective
- › One-person setup and simple operation
- › Ac and Dc models
- › Maximum vertical reach 46.88ft
- › Maximum capacity 159 kg

Vertical Mast Lifts

- › Self-propelled.
- › Easy To maneuver, use and transport
- › Low-weight machines.
- › Dc power.
- › Maximum capacity 227 kg
- › Maximum vertical reach 26.3 ft

Material Handling Telehandler

- › Heavy-duty, yet compact, for lifting, landscaping and agriculture.
- › Engine-powered 4 wheel steer
- › Models with four-wheel steer
- › Maximum capacity 6804 kg.
- › Maximum vertical reach 56.82 m

Material Handling Material Lift

- › Lightweight, low-cost material lifts
- › Ideal for an application that requires lifting, positioning, and installing air ducts, plumbing, sheetrock, ceiling panels, heaters, chimney pipe, electrical fixtures
- › Different models can be used as a hand truck, fork lift or dolly
- › Maximum capacity 227 kg
- › Maximum vertical reach 26 ft

ELLUMENO: The ultimate fusion of European design innovation with Chinese manufacturing efficiency!

Ellumeno with its registered Head Office in the United Kingdom and production facilities in China offers ground breaking lighting technologies that have not only built strong customer loyalty but also a robust international distribution network.

Our European design team knows that good lighting fixtures must fit effortlessly and seamlessly in any given building project. Our lighting models therefore follow a flawless, well-defined design which accentuates and emphasizes function. Each design is further developed and enhanced by our professional design team by working in close collaboration with industrial designers.

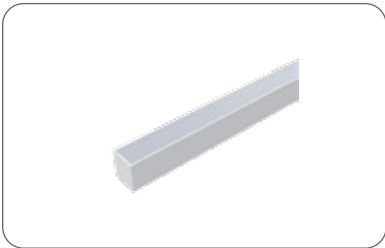

Besides distinctive and attractive looks and their modular design, our products offer many different creative possibilities for residential, industrial and commercial projects. Ellumeno LED-lights are sustainably produced from start to finish and only fitted with first-class LED- chips by renowned manufacturers. All drivers installed come with ENEC- classification and all Ellumeno products come with a 2 to 5- Year Standard Warranty. High production standards and thorough quality checks ensure superior workmanship of our complete range of Luminaries.

GOOD DESIGN IS SUSTAINABLE DESIGN

Our energy-saving luminaries are subject to the new EU-framework directive which is intended to ensure lower energy consumption and thereby protect the environment

Help build a “green” future: LED is no doubt the fundamental technology with huge savings prospective. Apart from providing superior light quality, LED’s offer great freedom of design and are highly energy efficiency, durable, cost effective and environmentally friendly.

QUALITY LED – LIGHTING

Today, every area of lighting has LED-technology firmly established in it. Building developers are now focusing on the lighting quality and they also look for innovative multi-functional lighting options. The following pages offer various examples with regards to the influence of such development on people and everyday life.

All lights by ELLUMENO are solely fitted with premium LED- chips by prominent international manufacturers.
